Ujarrás, and China Kichá, the hearth is more often constructed of clay on a wooden table. Here wooden beds and mezzanines made of wooden rods are used for sleeping along with hammocks. Plates, spoons, cups, etc., are seen in every household although their number is limited according to the family purse. The low stool is always present but a chair and a table are found now and then. Hanging shelves serve for storing food and all manner of odds and ends. Yeast for chicha, generally wrapped in *bijagua* leaves, is hung on the wall posts. The fondness for decorating the wall with feathers, eggshells, bones, and skins, however, remains the same as on the Caribbean side. Attached to the exterior of the house are hen's nests made of vine baskets or *havas*, a wild plant or orchid, and generally a piece of tree trunk containing wild bees.

DRESS AND ADORNMENT

An early report concerning the expedition of Fray Margil to the Province of Talamanca states:

> Their dress is very poor, because the men (are dressed) with their cloth of skins, and the women with their short cloths, and those who do not have them, with plantain leaves appear as contented as the best dressed Spaniards.[80]

Today, bark cloth (*see* Manufactures and Trade), still called *mastate* in Spanish, is used in upper Talamanca and upper Chirripó as shirts or Mother Hubbards, as loin cloths, and as bed covering. In the rest of the area inhabited by the Talamancas, it is only used as blankets. Sewing is done by both men and women but chiefly by the men.

The ordinary woman's garment consists of

y vara y medio de largo, con que cubren las partes de honestidad; las mujeres andan con una manta de lo mismo y algunas de algodón que la atan desde la cintura a las rodillas. . . ."

[80] De Espinosa, 1742, p. 64. "Su vestir es pobrisimo, porq los hombres con sus cendales de pieles, y las mujeres con sus pañalitos cortos, y las que no los tienen, con hojas de platanos se hallan tan contentos como los mas bien vestidos Españoles."

492 184 Very seldom on the Caribbean, but frequently on the Pacific side, horses and oxen are used for transportation (*see* Domestic Animals; fig. 2, *d*).

501 [133] **By Water.** The rivers in Bribri and Cabécar territory on the Pacific side do not lend themselves to water transportation. It is interesting to note that here the usual word for a boat, in both tongues, is a corruption of the Spanish [192] *canoa: kanó* in Bribri; *konǫ* in Cabécar. The Bribri of the Caribbean littoral, however, use besides the term just given, the word *ru*.[86]

Both Gabb and Skinner call attention to the lack of water craft among the Bribri,[87] but Pittier mentions cedar and ceiba canoes, some equipped with a sail and rudder for the sea.[88] This last type is not seen today, but dugouts are fairly common in the Sixaola River, men and women paddling or poling when necessary (*see* Canoes). Balsa logs are tied together with vines making rafts and are used to cross rivers in parts of upper Talamanca. The Cabécares are not seamen in any sense, and only those married to Bribri in the Sixaola Plain are known to manage dugouts.

482 **Carrying Devices.** The tumpline (*see* Fibers) is used by men around the shoulders or chest. By women, it is worn around the head for heavy burdens. Babies are carried by women [864] who tie them in a tumpline around the shoulders or in a piece of *mastate* around the waist (Fig. 9, *d*).

MANUFACTURES

283 [824] 248 [796] **Fibers.** There are many fiber plants used for cordage by these peoples. White cotton, one or two bushes of which are found near every household, is mainly ceremonial in use, being fashioned into string for tying death bundles (*see* Funeral and Bone Burial). The women make this by rolling the deseeded fibers with the palm of their hands over their thighs. The result is an uneven lumpy string but one that [777] they consider as very essential to prevent bad luck and to protect the dead. For use in sewing clothes, some women also make cotton thread ●[294] on spindle whorls. Occasionally, small carrying nets are manufactured from it.

[Text continues bottom of P. 21(B)--Analyst]

[86] *ru* is also the Boruca word for any water craft.
